

# ORIOLUS GALBULA.

## CHARACTER GENERICUS.

*Rostrum* conicum, convexum, acutissimum, rectum: mandibula superiore paulo longiore, obsolete emarginata.

*Lingua* bifida, acuta.

*Pedes* ambulatorii.

*Lin. Syst. Nat.* p. 160.

## CHARACTER SPECIFICUS, &c.

ORIOLUS luteus, loris alis caudaque nigris, rectricibus exterioribus postice flavis.

ORIOLUS luteus, loris artubusque nigris, rectricibus exterioribus postice flavis.

*Lin. Syst. Nat.* p. 160.

TURDUS luteus.

*Frisch. t. 31.*

TURDUS aureus.

*Klein. av. p. 66.*

GALBULA.

*Raii Syn. p. 68.*

Oriolus Galbula, aves plerasque Europæas pulchritudine superans, quemque satis abundanter alit reliqua Europa, in insulas Britannicas fortuitus hospes rarissime defertur. Magnitudo est quasi turdi communis. Color feminæ olivaceus.

THE  
GOLDEN ORIOLE.

*GENERIC CHARACTER.*

*Bill* conic, convex, very sharp-pointed, strait: the upper mandible rather longer than the lower, and slightly emarginated.

*Tongue* bifid, sharp-pointed.

*Feet* formed for walking.

*SPECIFIC CHARACTER, &c.*

Gold-yellow ORIOLE with black lores wings and tail: the exterior tail-feathers yellow on their lower part.

The Golden THRUSH.

*Edw. t. 185.*

Golden ORIOLE.

*Lath. Syn. 1. p. 449.*

WITWALL.

*Will. orn. p. 198.*

Le LORIOT.

*Buf. 3. p. 254. t. 17.*

---

The Oriolus Galbula, surpassing most of the European birds in beauty of plumage, is not uncommon

in Germany, France, and many other parts of the continent, but is seen only as an occasional straggler, (and even that but very rarely,) in the British dominions. Its size is that of a common thrush. The female is olive-coloured.
